

Regional Employment Trends

Employment in logistics, distribution, and light-manufacturing occupations across the Meridian Corridor grew 3.8% year-over-year in the twelve months ending June 2025, outpacing the broader metro employment growth rate of 1.4% over the same period.

Industrial Vacancy & Absorption

Industrial vacancy within the Meridian Corridor fell to 4.1% as of the second quarter of 2025, down from 5.6% a year earlier, on net absorption of approximately 1.9 million square feet against 1.2 million square feet of new deliveries.

Investor Sentiment

Institutional buyers active in the corridor report continued cap rate compression for stabilized industrial assets, with several respondents citing capital allocation targets that favor last-mile logistics over suburban office product through the remainder of the year.
